Ezekiel Galauran

CS Student & Software Developer

ezekielgalauran@gmail.com · linkedin.com/in/ezekiel-galauran · github.com/apcedgalauran

I build full-stack web applications and take them all the way to production.

EDUCATION

BS Computer Science, Software Systems

August 2023 – August 2027 (expected)

Asia Pacific College, Makati City

Honor's List — AY 2023–2024, 2024–2025

Relevant coursework: Cybersecurity, Database Management, Systems Analysis & Design, Threat Detection Analysis, Software/System Development

Certification: OCI 2025 AI Foundations Associate — Oracle, November 2025

EXPERIENCE

Optum — Student Advocate Program

November 2026 – Present

Intern, Early Careers

Started November 5, 2026.

APC × NAMFREL — 2026 BARMM Parliamentary Elections

September 2026

DevOps & Infrastructure (Sub-Team 4) — Production Deployment

APC served as the NAMFREL Election Data Analytics Center for the September 14–15 elections.

- Handled continuous deployment of the live election portal on Vercel through election day
- Shipped 13 production deployments on September 14, including teammates' changes that the team's Vercel plan blocked from deploying — pushed through trigger commits from my authorized account
- Verified each production deployment during my shift before handing off to the next shift

namfrel-barmm2026.apc.edu.ph

PROJECTS

Dorotheo Dental Clinic Management System

March 2025 – March 2026 · Preparing for clinic rollout

Client system · Team of 5 · Project Manager & Full-Stack Developer

A multi-portal platform for a real dental practice — patients, staff, and the clinic owner — covering scheduling, clinical records, billing, inventory, and an AI chat assistant, with an audit trail on every change to patient data.

- Led a team of 5 as Project Manager and full-stack developer
- Django REST backend: 26-model schema, 27 serializers, append-only audit trail
- Deployed across Vercel, Railway, and Azure

Django · Django REST Framework · PostgreSQL · Next.js 15 · TypeScript · shadcn/ui · Redis · Resend · Sentry · Azure Blob Storage · Docker

Motor Tool & Sub-Component Pumping Hour Tracking System

March 2026 – present · In production use

Independent project · Sole developer

Field technicians swap motor sub-components between motors constantly, so no one could tell how many hours an individual part had run. This system tracks every part's lifetime pumping hours across every motor it has been assembled into.

- Built, deployed, and maintain it alone; in use by field technicians in Abu Dhabi
- Transactional hour cascade from each motor to its assembled parts
- Next.js + Prisma on Vercel, with Neon Postgres in the same region

No public link or screenshots, because the application holds live company data.

`Next.js 15 · React 19 · TypeScript · Prisma · Neon Postgres · NextAuth · Vercel Blob · pdf-lib · Tailwind CSS · Vitest`

XLM-JUD: Dialect-Aware Smishing Detection

Undergraduate thesis · AY 2026–2027 · Co-author — research and writing (did not write the model code)

Smishing detection in the Philippines is hampered by scarce, imbalanced datasets and Tagalog, Cebuano, and Ilocano text that English-trained filters misread.

- Original XLM-RoBERTa: accuracy 98.61%, Macro-F1 0.9849, MCC 0.9698
- XLM-JUD: accuracy 98.19%, Macro-F1 0.9802, MCC 0.9606
- Classical baselines: Macro-F1 0.9373–0.9561
- Back-translation did not improve classification (210 vs. 161 errors; McNemar's test $p < 0.001$). SMOTE also lowered classical-model performance.

`Python · XLM-RoBERTa · Meta NLLB-200 · FLORES-200 · SVM and Logistic Regression (TF-IDF) · SMOTE`

DEPLOYMENT & INFRASTRUCTURE

Vercel	Production deployments for Next.js frontends and a Django backend (serverless WSGI); custom domains; live redeploys during a high-traffic event (Dorotheo Dental, Motor Tracker, NAMFREL portal, ezgalauran.dev)
Railway	Deployed the Django backend with Nixpacks, a Procfile, and release scripts (Dorotheo Dental)
Azure	Django backend on Azure Web Apps; media on Azure Blob Storage with per-type cache policies; Gemini API connected to the Azure-hosted backend over SSH (Dorotheo Dental)
Neon	Serverless Postgres co-located with Vercel in Frankfurt, keep-alive scheduling, migrations (Motor Tracker)
Supabase	Managed PostgreSQL for the Django backend, with a SQLite fallback for local development (Dorotheo Dental)
Docker	Dockerfile for containerized backend deployment (Dorotheo Dental)
Observability	Sentry error monitoring and tracing; production logging (Dorotheo Dental)
Email & DNS	Resend transactional email, including domain authentication records (SPF, DKIM, DMARC) (Dorotheo Dental, ezgalauran.dev)

LEADERSHIP

Vice President, APC Band — Jul 2026 – Present

Internal Vice President, APC Microsoft Community (APC-MSC) — Nov 2025 – Jun 2026

Executive Director of Events and Programs, APC Microsoft Community (APC-MSC) — Nov 2024 – Jun 2025

Assistant Director of Operations, JPCS – APC — Nov 2024 – Jun 2025

Speaking & hosting

- Speaker, Microsoft Sandbox: Building Your Startup with Microsoft 365
- Speaker, SoCIT Officer Workshop 2025
- Host, Microsoft Learn Student Ambassador event
